

Carbon Reduction Plan

Reliance Medical Ltd.

Reliance Medical Ltd. is committed to achieving net zero emissions by 2045.

Baseline Emissions Footprint vs Current Emissions Footprint

Baseline emissions are a record of the greenhouse gasses that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Carbon Reduction: Projected vs Actual

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets. We project that carbon emissions will decrease over the next years to 32.5572 by 2045 this is a reduction of 90%

Additional Details About our Emissions and Targets

Year	Comments
2022	Employee owned vehicles - No activity recorded due to availability of electric pool vehicles. Air Travel - No activity recorded due to no internal flights taken in 2022

Carbon Reduction Projects

The following environmental management measures and projects are currently in progress or have been completed since the 2022 baseline.

Actions In Progress

Carbon Offsetting

Target Completion Date: 20/06/2026

Objective

Investigate the options available to offset some or all of the carbon emissions generated by the organisation.

Target

To offset a percentage of any addition company carbon emissions in 2025.

Action, Improvement or Control

To find independently verified carbon credits and select a provider for the organisation

Transportation - Receiving and delivery of goods

Target Completion Date: 20/06/2026

Objective

To investigate a change of current goods delivery provider to an alternative EV based transport provider and work with current logistics partner to transform their current fleet to include greater provision of EV based transport.

Target

To see a reduction of c02 emissions relating to delivery of goods.

Action, Improvement or Control

To request environmental policies from delivery companies used.
Encourage and incentivise customers to bulk buy and order efficiently.
Change to lower emissions transportation options eg couriers who use electric vehicles.

Electricity - Renewable Supplier

Target Completion Date: 20/06/2026

Objective

To increase amount of electricity purchased from renewable providers.

Target

To investigate the generation of electricity in Main Premises building from renewable sources.

Action, Improvement or Control

Source a renewable energy provider Investigate on site renewable sources eg solar / wind

Completed Actions

Installation of solar panels

Completion Date: 01/06/2023

Estimated Carbon Reduction: 0.0000

Objective

Reduce the usage of electricity from the grid

Target

Action, Improvement or Control

Install solar panels onto the roof of the main building

Impact:

Reduced the use of electricity from the grid
