TRAUMAFIX™ TACTICAL

EMERGENCY LIFESAVING EQUIPMENT

In combat and high-risk operational environments, major trauma from gunshot wounds, blasts, vehicle accidents, and other major injuries can lead to rapid deterioration or death - especially when severe bleeding is left unchecked. Immediate intervention is vital.

TraumaFix™ delivers a continuously evolving range of advanced trauma solutions, engineered to meet the demands of military, tactical field care and law enforcement. TraumaFix™ is designed to stabilise casualties in the field until full medical support is available, providing the best chance of survival.

From advanced bleed dressings to innovative splints, each TraumaFix™ product is designed to maximise survivability and support lifesaving action when every second matters.
